Mountain Weather Forecast

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran

Forecast valid from 06:00 on Thursday 15 Oct 2020 until 23:59 on Friday 16 Oct 2020

Forecast Issued on Thursday 15 Oct 2020 at 03:07 by Met Office Aberdeen

Confidence: High for a spell of largely dry and settled weather until later Sunday, but some uncertainty over cloud cover details (west generally being best). Low confidence by Monday but likely unsettled.

Headline for Thursday 15 Oct 2020: Dry and sunny, a little cloudier in the east. Light winds.

Forecast for Thursday 15 Oct 2020

Weather: A chilly start with some patchy frost and the odd patch of fog or low cloud in the glens. Plenty of unbroken sunshine through the day, especially along the west coast. Turning cloudier at times across eastern Lochaber, Arran and The Trossachs, but staying dry.

Chance of cloud free mountain/hill tops above 800m: 95% with little if any cloud on the hills.

Visibility: Generally excellent with good clarity to the air.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Note temperatures around freezing near and above munro level.

Forecast for Friday 16 Oct 2020
Weather: On the whole a cloudier day to Thursday as areas of cloud drift westwards through the Central Belt, this cloud thick enough to allow the odd light shower over Arran and The Trossachs. Argyll and Lochaber will stay more reliably clear, especially through morning with sunshine here.

Maximum wind: Variable direction, but generally easterly, 5-10mph.

Chance of cloud free mountain/hill tops above 800m: 80% falling to 20% across the south and east with cloud becoming fairly extensive above 500-600m.

Visibility: No issues below the cloud base, but persistent poor visibility likely across the bulk of the east at height.

Temperature: **Glens:** 0-3C rising 9-11C.
At 800m: 2-4C.
Freezing level: 1200m rising above summits.
